

Welcome to Pyhäjoki Upper Secondary School

Pyhäjoki Upper Secondary School emphasizes self-determination and autonomous learning, entrepreneurship education being part of all learning. An entrepreneurial culture and procedures are realized in cooperation with the operational environment: the students are responsible for the local paper, which they publish weekly, and the annual Entrepreneur Fair in the region. Continuous international projects and annual study trips abroad are part of the curriculum and the achievements of the school have been nationally and internationally recognized.

The school has been a venue of in-service teacher training on Content and Language Integrated Learning (CLIL) for years. Erasmus+ funded courses for teacher development for European teachers and training courses for Finnish and non-European teachers are offered together by CLIL experts from Finland and from the University College London, Institute of Education, UK.

E-learning solutions offer the ability to share knowledge and materials in all kinds of formats, so participating in and conducting live online classes and communicating with a number of professionals via chat and message forums has long been an option available to our students. For pupils of immigrant backgrounds, whose Finnish language skills are not sufficient to study in Finnish-speaking groups, individual syllabi based on the national curriculum are created. The objective is to support the pupils' integration into Finnish society and to give them the necessary skills to achieve the objectives of the national curriculum.

We, the teachers and the students, are happy to tailor-make a productive school visit to your family any time convenient for you.
